

# THE NAUTICAL INSTITUTE NZ BRANCH 'OCEAN FLYER'

Ocean Flyer plans to start operating fully electric seaglidors in New Zealand by 2025. The seaglidors will be sustainable, fast, comfortable and affordable.

The seaglider is a wing-in-ground-effect craft that operates a few meters off the water's surface and couples the high speed of an airplane with the low operating cost of a boat.

The New Zealand Branch of The Nautical Institute, in partnership with The Royal Institution of Naval Architects (NZ), Institute of Marine Engineering, Science & Technology (IMarEST), and New Zealand Company of Master Mariners, are proud to co-host a presentation from Ocean Flyer.

Date: Tuesday, 24 October 2023, 20:30 AEDT (18:30 NZDT)

Location: NZ Marine, 85 Westhaven Drive, Auckland

Online Attendance via Zoom Link (please register by RSVP below).
